

Cover letter Juan Pablo Devecchi Martinengo

| Junior Front End Programmer, 6 years of experience in startups as CEO.

Good morning,

If you're wondering why you should hire me to fill a Front End Developer position at your company, here are some reasons:

- More than 6 years of experience in the management of 2 software projects, from the business idea development to consolidation of the projects as success stories in the market.
- Leader of development teams using agile software development frameworks and goal setting, eg, SCRUM, KPI Key Performance Indicators, OKR Objectives and Key Results.
- I have worked mainly in financial applications automating thousands of daily transactions, being directly responsible for a successful result; therefore, I have dealt with scalability and real world performance problems. I know what it means to adapt immediately in response to user needs and market currency situations.
- I'm seeking to gain experience and knowledge in Front end technologies and I feel comfortable developing computer codes with technologies such as JavaScript, EJS, Node.JS, npm, React, Bootstrap, SASS. Please, I hope you are willing to consider me now...
- I will add to the diversity of your team and research has shown that diversity often makes for better and more successful teams.

If I have given you a convincing reason to consider my application, and I really hope I have, then please review the attached resume. I am ready to answer any questions you may have.

I hope to hear from you soon,

Juan Pablo Devecchi Martinengo

SUMARY

I have been working since I was 14 years old, always as an entrepreneur, contributing to each project seeking to achieve the objectives or beyond. I recently moved to Spain and got up to speed on the latest technologies during confinement. I am looking for a workplace that offers the opportunity to improve my code development skills and meet new people. I hope to learn expand my knwoledge and improve day by day.

LABOR PERFORMANCE IN STARTUPS

Expensas Online S.A. www.expensasonline.pro

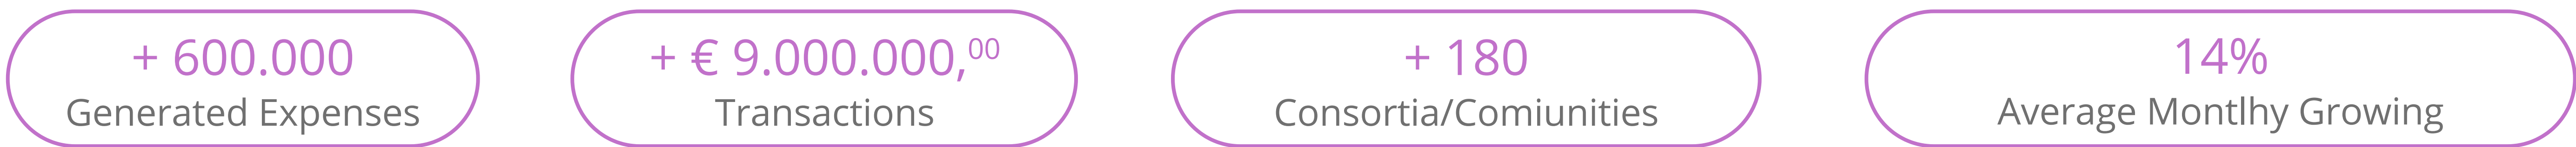

Project idea:

Expensas Online is a software as a web service (SaaS) for consortia / communities, focused on solving the problem of administration and management of common expenses, providing a collection service that facilitates payments from owners / tenants.

Project scope:

Expensas Online is the 2nd largest consortium administration system in Argentina.

Metrics:

Roles and responsibilities that I developed in different stages of the project:

- Product Owner
- Product Manager
- Director of Operations (COO)
- Design of business plan and strategy.

Zenrise S.A. www.zenrise.io

Project idea:

Zenrise is a Fintech-type software as a web service (SaaS) that allows any professional or company to manage and process their collections, integrating complex and fragmented electronic and traditional payment channels. It allows to operate even without a bank account by receiving payments in a virtual wallet and routing payments to providers automatically.

Project scope:

Zenrise was launched on the market as in 2018 as the only B2B recurring collection system in the province of Córdoba, Argentina

Metrics:

Roles and responsibilities that I developed in different stages of the project:

- Product Owner
- Design of business plan and strategy.
